

IT MANAGER – SPATIAL SERVICES

Department: Finance
Job Class #: 635400
Pay Range: Executive 11

FLSA: Exempt
Represented: No

Classification descriptions are intended to present a descriptive list of the range of duties performed by employees in this class and are not intended to reflect all duties performed within the job.

GENERAL FUNCTION:

The IT Manager Spatial Services sets the strategic and tactical direction for the Division, makes decisions independently, and understands technologies used in County operations and the supporting technical theories. This position provides primary direction and supervision to IT staff who are responsible for planning, developing, maintaining and enhancing applications/systems for County Departments, Offices, Courts and affiliated agencies. The IT Manager Spatial Services is responsible for developing creative and innovative solutions and driving execution from initiation to completion. This position assesses and monitors the Division's business and project performance, establishes service levels, and addresses resolution of escalated issues.

Additionally, this position must work cross-functionally and effectively with other IT professionals and department tech staff to fulfill service-level agreements and ensures that appropriate IT resources are identified and distributed where needed. This position works with departmental, state, federal & local stakeholders to negotiate the initiation/continuance of applications/systems based on business needs and available resources, and institutes adequate controls for underlying programs per departmental, state, and federal IT policies & standards.

ESSENTIAL FUNCTIONS:

The IT Manager for the Spatial Services Division provides domain expertise and leadership in IT Division projects and assessments with the following responsibilities:

- Direct the administration, development, operations, support, and maintenance of enterprise asset management and GIS. Develop strategic plans and roadmaps for countywide, enterprise spatial technologies and regional subscription services.
- Lead efforts to define, analyze and implement the strategic business planning for technical and functional improvements to support high-rate growth of - GIS and asset management applications and services. This includes infrastructure, system development and integration, data construction, application functionality, and support services.
- Lead business development efforts to expand technology subscription programs.
- Manage the implementation teams for enterprise projects, develop and administer training programs, and produce technology results that exceed client requirements with enterprise systems.
- Matrix-manage cross disciplinary IT and customer teams working on multiple complex projects.
- Provide technical input and recommendations for contracts, software and related goods and services needed for technology areas. Negotiate with and direct vendors and contractors, including contract management.
- Participate as a member of the Information Technology management team and plan, organize, and set performance measures for goals, initiatives, staff and division budgets. Contribute to IT management project reviews and benefit/cost analysis.
- Manage assigned operations to achieve Division goals within budgeted funds and available personnel.

- Provide leadership and direction through developed short and long-range technology plans. Review and update annual and multi-year plans to assure their implementation and continued maintenance.
- Lead the process of establishing project scopes, system designs, business and technology analysis, system development, and testing throughout the system's lifecycle.
- Plan and organize workloads and staff assignments; review progress, and direct changes in priorities, schedules, procedures to meet deadlines.
- Motivate staff by setting and achieving challenging goals; demonstrate persistence in overcoming obstacles.
- Lead change management and risk management, identifying appropriate resources and developing schedules to ensure timely project completion. Manage risks by considering the ultimate impact of decisions and actions.
- Provide periodic reports of enterprise technology and support activities as required to achieve and maintain performance measures.
- Select, supervise, coach and evaluate assigned staff. Establish work rules and performance standards, conduct and oversee performance evaluations and initiate and implement disciplinary actions as needed. Resolve grievances and other personnel matters. Provide for the training and motivation of subordinates in order to make full use of individual capabilities and to meet changing system demands.
- Oversee the development, implementation, and maintenance of technical solutions, support standards, business continuity, and disaster recovery.
- Partner closely with other department managers to ensure proactive planning, smooth deployment, and excellent on-going support for their applications.
- Improve, tune and expand all systems as growth demands.
- Effectively market IT services, promote technology initiatives, and advocate strongly for project benefits.
- Be a visible leader in organization change management for IT related initiatives.
- Plan, develop, and administer the Division's budget and provide data for cost allocation.
- Develop service level agreements and service level standards to support efficient and economical performance.
- Provide excellent customer service for assigned areas, adapted to the needs of Pierce County departments.
- Serves as a technology ambassador and liaison for the Information Technology Division by establishing and providing proactive communication with clients, team members, and management. Conduct outreach to peer organizations, universities, and external clients.
- Present County technology achievements at IT conferences and participate as a member of County-wide, State-wide, and other committees and groups when necessary to fulfill the general duties of the position.
- Maintain regular, predictable and punctual attendance during regularly scheduled work hours at assigned worksite.
- Meet travel requirements of the position.
- Perform the physical requirements of the position; work within the established working conditions of the position.
- Work a flexible schedule, which may include evenings, weekends, and holidays.

OTHER JOB FUNCTIONS:

- Assist department director with special projects as assigned.
- May function on behalf of the Assistant Director of Information Technology.

- Perform other job functions as assigned.

KNOWLEDGE, SKILLS, AND ABILITIES

Knowledge of:

- Current software systems and technology in the areas of GIS, asset management, work order management, spatial open source, mobile platforms, large database management, data conversion, orthophotography, GPS data collection and other related technologies deployed in County government.

multi-faceted issues as they arise.

- Keep up-to-date technically, and apply new knowledge to creatively develop, design, and innovate new solutions, ideas, relationships, or products.
- Develop, implement and maintain policies, standards, and procedures.
- Handle difficult or sensitive situations with diplomacy and tact, while maintaining confidentiality.
- Balance team and individual responsibilities; work in a collaborative manner with technical and non-technical personnel; exhibit objectivity and openness to others' views; build a positive team spirit; treat others with respect regardless of status or position; inspire the trust of others; facilitate knowledge share between individuals to contribute to team effectiveness and supports everyone's efforts to succeed.
- Mentor staff in job duties and responsibilities and provide guidance to direct reports on problems.
- Establish and maintain effective communication and working relationships with staff, vendors, contractors, management, public officials, the media and the general public.
- Effectively coordinate, perform, and complete multiple duties and assignments concurrently in a fast-paced environment (24/7/365) and in a timely manner. Manage competing demands; able to deal with frequent change, delays, or unexpected events.

SUPERVISION RECEIVED AND EXERCISED: Work is performed with considerable latitude for independent judgment and the employee is expected to manage services and staff in conjunction with the Department's mission. Work is reviewed through meetings, projects, and by overall evaluation of results obtained by the Assistant Director of Information Technology for compliance with regulations, policies and procedures. The use of independent judgment and initiative are necessary in the performance of the essential functions of the position, and position has full supervisory responsibility for assigned employees.

WORK ENVIRONMENT: The work environment characteristics described herein are representative of those an employee encounters while performing the essential functions of the position. Work is primarily based in an office setting. Work is generally completed on a regularly scheduled basis, however, attendance at meetings or completion of work outside of normal scheduled hours may be required. Extended periods of concentration and sedentary work are required. Work is subject to frequent interruptions and normal office noise.

PHYSICAL REQUIREMENTS: The physical demands described herein are representative of those that must be met by an employee to successfully perform the essential functions. Physical activities required are finger dexterity necessary to operate equipment used in the position, talking, seeing and hearing. Ability to move throughout an office environment, sitting, bending/stooping, pushing/pulling and minimal unassisted lifting associated with the job duties is required. Travel to various work sites throughout the region may be required.

MINIMUM REQUIREMENTS TO APPLY:

- A Bachelor of Arts or Bachelor of Science degree in information technology, computer sciences, business, engineering or related field, and
- Eight or more years of applications development experience, including
 - Five years or more of complex project management experience and
 - Four or more years supervising technology professionals required.
- OR any equivalent combination of experience and education is required.
